

MTS AG
Mathematisch-Technische-Software

tool-kit PROFESSIONAL by MTS AG

Software-Modul

Spezifikation „Optionen“

Stand: 07.06.23

MTS AG
Rheinstraße 81
CH-4133 Pratteln 1
Tel.: 0041 / 61 81 59 130
Fax.: 0041 / 61 81 59 139
e-mail: info@mtsag.net

MTS AG
Mathematisch- Technische Software

MTS AG
Mathematisch-Technische-Software

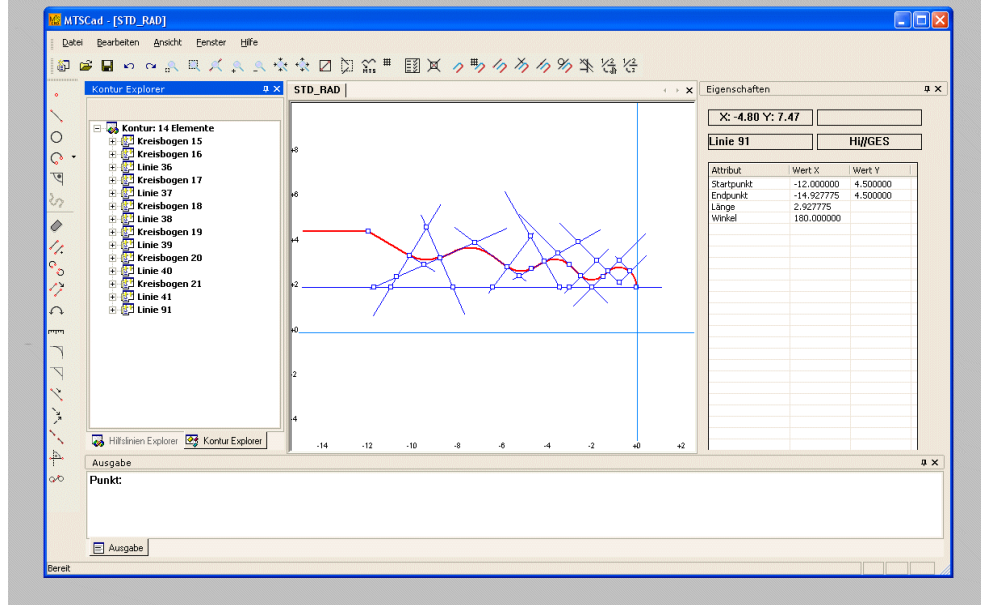

Options	
17.1 Construction of Flute Profile / Wheel Profile	Options for FMENU / BMENU
	
17.1 Basic Modul Construction of Flute Profile / Wheel Profile	
<ul style="list-style-type: none"> • Construction of Flute Profile: • Construction by integr. CAD • Calculation of wheel-profile • Calculation of grinding track • Intersection simulation • Output of wheel discription

MTS AG
Mathematisch-Technische-Software

18.1 CAD Modul

Option CAD

18.1 CAD Modul

- CAD-Program spezilized to the usage of tool-construction including interface to the grinding-modules.

MTS AG
Mathematisch-Technische-Software

19.1 Dressing Cycle / Wheel Profile		Option
19.1 Dressing Cycle / Wheel Profile		
<ul style="list-style-type: none">• Wheel dressing:• Input of dressing parameter within machine world• Calculation of dressing cycle driven by given wheel profile (Pos. 19)

Mathematisch-Technische-Software

20.1 Open Procedure Genrerator	Option für alle Module
	
<p>20.1 Open Procedure Genrerator Construction and generating of selfmade additional operations. Integration at any operation-position.</p>	
<ul style="list-style-type: none"> • Generating of open procedures: • Graphical construction of open procedures • Up to 10 different additional operations per modul • Import/Export by global database • Inserting at any position within machining order • Seperate wheel and technology to each open procedure • Movement- and intersection-simulations 	

MTS AG

Mathematisch-Technische-Software

21.1 Basic Modul CNC-Collision-Control	Option for all Moduls
	
<p>21.1 Basic Modul CNC-Collision-Control</p>	
<ul style="list-style-type: none"> • Functions: NC_start without collision-control NC_start with collision-control and auto stop at first collision. NC_start with collision-control and collision protocol of all situations NC_simulation without collision display NC_simulation with collision display • Extended CNC-Generator: Collision-control: Yes / No Mode-selection: „Stop at first collision“ / “All collisions“ • Mode „Stop at first collision“: The modul stops the calculation of the CNC-code by recognition of the 1st collision and shows these graphically on the scope • Mode „All collisions“: First the CNC code will be calculated completely. Subsequently we will have a listing of all collision situations. In the following these can be individually plotted and examined. 	<ul style="list-style-type: none"> • Administration of the collision objects (Setup): 4 object lists: Basical objects, tool-objects, clamping- and spindle-objects. The list administration takes place in each case by inserting, copying, renaming or deleting. The selection of the objects which can be considered concerning the collision takes place via activating in the object lists. • Collision calculation: Examining the penetration of all activated objects, as well as the active grinding wheel outside of the workpiece. Generating the collision protocol.

MTS AG
Mathematisch-Technische-Software

22.1 tool-kit 3D-view 2.0

Option for all Moduls

22.1 Basic Modul tool-kit 3D-view 2.0

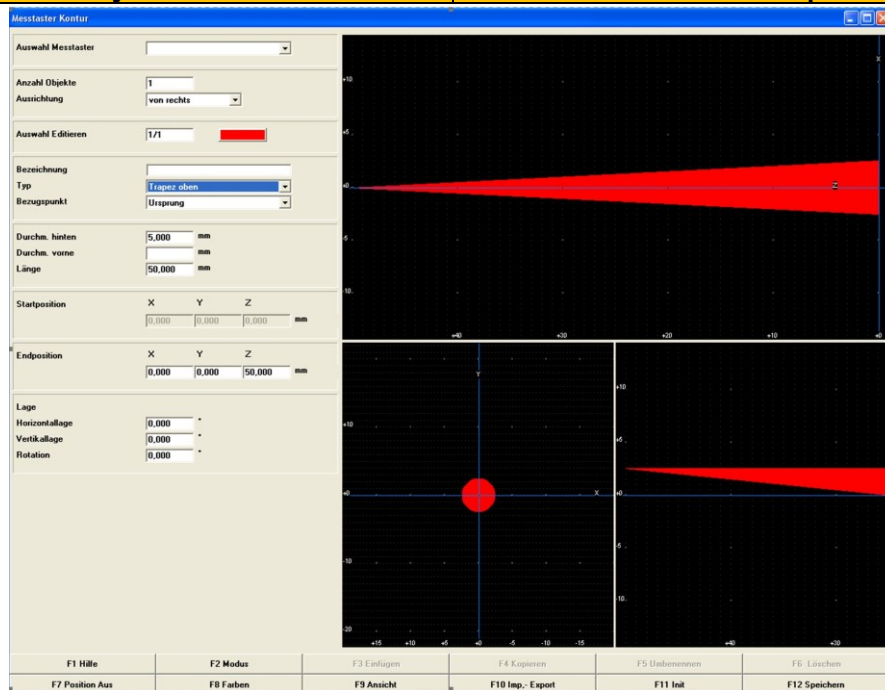

- Tool-simulation in 3D**
 Integrated call of 3D-simulation from all moduls including 3D simulation view
 Positioning of the workpiece in three Rotary axes (3D view).
 Save 3D views.
 2D grid and 2D measurement (distance, angle, radius).
 3D measurement (points, distance).
 Section plane display
 Snap2Point feature.
 Refining function for cutouts.
 Transparency view
 Adding operations (not everything new count).
 Loading STL blanks.
 Save as STL file. Display of STEP files

MTS AG
Mathematisch-Technische-Software

23.1 Measurement-Cycles

Option for all Moduls

23.1 Basic Modul Measurement-Cycles

- **Measurement-Cycles for 3D-probing-system**
Length
Tooth-positioning
Helix lead (zylindrical, conical)
Diameter (zylindrical, conical)
Teeth-indexing

MTS AG
Mathematisch-Technische-Software

24.1 MTS-interface to an external Measurement-Machine

24.1 MTS-interface to an external Measurement-Machine

- Interface within tool-kit PROFESSIONAL to a measurement-machine (Exp. Zoller genius 3).
- Exchange of geometry data between MTS software and a measuring machine.
- Measurement of workpiece data and wheel geometry
- Reading back the measured datas
- Decision for further processing.

- Measurement-data will be read and analysed by the error-handling-procedure.
- The generated correction-data will be used in order to come to correct must values at next grinding step.
- Correction Options:
- **Correction on the wheel data:**
Reasonable corrections f.e. at diameter, rake-angle and wheel-distance.
- **Using the operation-specific correction table:**
Corrections at machine-data or wheel-data.
- **Correction of tool parameter:**
Correction in inverse direction to the actual value and setpoint.
