

- Integrated 2D-simulation of the machine
- 3D-workpiece simulation
- Automatic collision monitoring
- Pre-calculation grinding time
- Parameterization of free grinding surface
- High flexibility and rapid development
- Connection to workpiece measuring machines
- Calculation disc profile and dressing
- Available SW modules
 - Standard and spherical cutters
 - Rotary cutters
 - Drills
 - Profile tools
 - Pre-grinding
 - Tap hole drills

www.mtsag.net

- M675 Grinding machine with automation
 - for twist drills
- M647 / M642 Grinding machines
 - for root canal instruments
 - for profile tools
 - for rotary cutters
- M665 Pre-grinding machine
- M648 Rotary transfer grinding machine

Benefits

- Customized machine implementation
- Extendable range of application
- Wide, flexible product range
- Processing of orders out of ERP
- Import of «Zoller data»
- Short reaction times
- Worldwide aftersales service
- Possibility of retrofitting
- Operating data record
- Grinding tests in our competence center
- MTS: 30 years of experience in tool grinding
- M+Z: 55 years of experience in machine engineering
